# AI

Artificial Intelligence  
for Container M&R

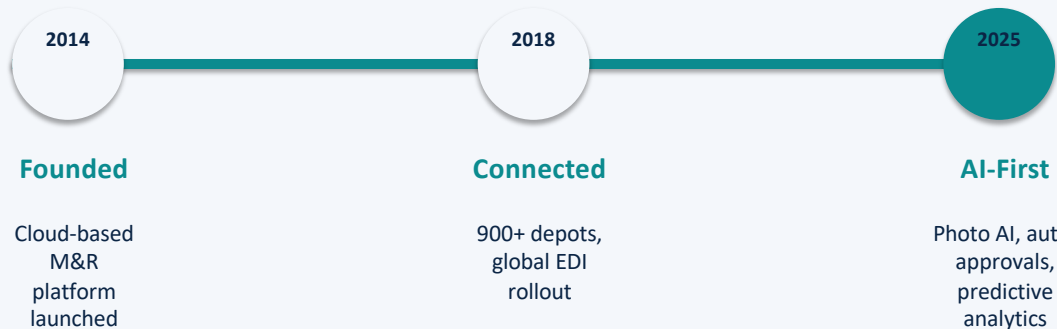

+ AI-POWERED

OUR AI JOURNEY

# From M&R Software to AI Platform

EOS began as the industry's leading M&R management tool. Today, we are completing a strategic pivot — embedding AI throughout every workflow, every decision, every output.

*Transform shipping through intelligent, AI-driven platforms that enhance visibility, efficiency, and sustainability at scale.*

— EOS AI Vision

Founded 2014 · Container Shipping & Logistics  
Core: M&R, Integration, AI & Analytics

ABOUT EOS AI

# End-to-end M&R intelligence for every stakeholder

- >**Leading cloud-based M&R platform** specializing in the container shipping industry
- >**End-to-end solution** for shipping lines, depots, lessors, surveyors & resale companies
- >**AI-powered automation** of operational workflows with real-time visibility
- >**Advanced Reporting & BI** with data-driven decisions at every level
- >**Open integration** EDI, direct input, mobile — minimal disruption to existing systems

SL

## Shipping Lines

Off-hire & in-service estimates, third-party claims, fleet-wide visibility

DP

## Depots

Mobile estimating, photo capture, EDI connectivity, automated billing

LC

## Leasing Companies

Off-hire handling, multi-level approval matrices, complete audit trail

SV

## Surveyors

Mobile apps with offline capability, Photo AI integration, digital forms

GLOBAL CLIENT BASE

## EOS Technology is Trusted by the World's Leading Container Operators

...and many more depots, leasing companies & surveyors worldwide

+ AI-POWERED

PLATFORM OVERVIEW

# EOS AI Capabilities at a Glance

 <b>Photo AI</b> Computer vision analyzes damage images — faster, more accurate assessments	 <b>Mobile Apps</b> Custom iOS & Android apps for depots, surveyors & leasing companies	 <b>Auto-Approvals</b> AI rule engine auto-approves or flags estimates in real time	 <b>Vendor Connectivity</b> EDI integration connects all depots and trading partners seamlessly	 <b>Data Mining &amp; BI</b> KPI dashboards and predictive analytics for smarter decisions
 <b>Billing Automation</b> Streamlined invoicing from estimate approval to payment	 <b>Third Party Claims</b> AI-assisted damage attribution and claims documentation	 <b>Custom Integrations</b> Open API connects EOS AI to any in-house or 3rd-party system	 <b>Tariff &amp; Parts Mgmt</b> Automated line-item checks and reefer parts price validation	 <b>Back-Office Service</b> Full managed-service option with dedicated EOS AI support team

Red border = AI-enhanced capabilities

WHY EOS AI

## Use EOS AI to Drive Operational Excellence

**Digitize** Drive complete digitization of container M&R operations

**Collaborate** Deliver cloud-based real-time collaboration across all stakeholders

**Lead with AI** Lead adoption of AI for M&R management — from photo analysis to decisions

**Integrate** Connect off-hire, in-service & emergency EORs in one ecosystem

**Cover 100%** Connect all depots, surveyors & stakeholders — 100% coverage

**Analyze** Enable KPI-driven process management, analytics & business intelligence

**See Smarter** Leverage digital images and AI for faster, more accurate decisions

**Go Mobile** Deliver customized mobile applications for every user role

FINANCIAL INTELLIGENCE

# AI-Driven Cost Controls

## Tariff Validation

AI checks every line item — sender and receiver — flagging discrepancies instantly

## Genset Fuel Management

Automated fuel cost validation prevents billing errors on reefer units

## Labor Rate Governance

Controlled hourly rates enforced across all depots globally

## Handling & Ancillary

AI tracks mounts, dismounts, and ancillary repair charges end-to-end

## PTI Cost Optimization

Pre-trip tracking eliminates unnecessary inspections — reducing PTI spend

## Auto Approval/Rejection

Rule-based AI alerts flag or auto-reject estimates above thresholds

## Parts & Price Validation

Better control on reefer parts pricing with AI-powered benchmarking

+ AI-POWERED

BUSINESS IMPACT

## Why EOS AI? Measurable Results.

\$\$

### Cost Control & Financial Transparency

AI-powered tariff checking, auto-approvals, and audit trails reduce M&R overspend.

>>

### Faster Approvals & AI Decision Support

Business rules and AI-driven decision engines dramatically cut approval cycle times.

--

### Reduced Workload & Headcount

Data analytics and auto-approval rules eliminate manual review — fewer FTEs, higher throughput.

\*\*

### 100% Real-Time Connectivity

Every depot, surveyor, and stakeholder connected in one live ecosystem — zero gaps.

>>

### Intuitive Reporting for Management

Executive dashboards and custom reports turn M&R data into actionable intelligence.

->

### Streamlined Vendor Billing & Payments

End-to-end billing automation standardizes vendor payments and eliminates disputes.

END-TO-END SOLUTION

# The EOS AI End-to-End Solution

**+Collaborative** Online M&R management built around industry best practices

**+Flexible** Standalone system or fully Managed service

**+Process Control** Best-practices repair cycle management with full audit trail

**+Dedicated Teams** Specialist software development and 24/7 support

**+AI & Analytics** Standard and customized AI, BI, and predictive reporting

**+Secure** Enterprise-grade data and user security at every layer

**+Integrated** Fully-customized integration with any existing system

**+Commercial** Flexible commercial models — CAPEX or OPEX

1 Open / Receive Estimate

2 AI Review & Validation

+ AI-POWERED

3 Approve / Auto-Approve

4 Repair & Documentation

5 Invoice & Payment

AI DEEP DIVE

# Photo AI & Intelligent Analytics

## AI Photo AI

- >Computer vision analyzes damage images at submission
- >Identifies damage type, location & severity automatically
- >Compares against repair history to flag duplicates
- >Reduces manual review time by up to 70%
- >Fully integrated into the estimate workflow

## BI Business Intelligence

**Depot Performance:** Estimate accuracy, billing accuracy, repair quality KPIs

**Cost Trend Analysis:** By equipment type, trade lane, and time period

**Survey Effectiveness:** Field survey quality scoring and improvement tracking

**Damage Experience:** Pattern detection by unit type and damage category

**Custom Dashboards:** Fully customized reports for management at every level

# Ready to transform your M&R operations?

# EOS AI

EOS AI is prepared to deliver a comprehensive,  
AI-powered solution tailored to your fleet.
